

NOTICE

OF HYDRO WORK IN YOUR NEIGHBOURHOOD

June 2019 – August 2019

SYNERGY NORTH is in the process of replacing our underground main feeder cables from the Walsh St. Transformer Station to new poles located on Collins Place and Selkirk St. 3 Poles will be replaced along Collins Place between Harkness St. and Selkirk St. and 1 pole will be replaced near the corner of Selkirk St. During the course of the project, no power interruptions are expected.

Both our company and contractor trucks will be on location. This will improve the reliability of the underground assets in the neighborhood and make the system more efficient.

The following area will be affected:

- Selkirk St.
- Collins Place

If you have received this notice, you may experience a few traffic delays during the course of the project.

If you have any concerns, special schedules or questions,
please call

Jonathan Murphy, Lines Construction Supervisor

807-343-1176
