

## Notice of Hydro Work in Your Neighbourhood

**July – October 2022**

SYNERGY NORTH is in the process of upgrading the electricity system throughout the area. The area described below is scheduled to be upgraded beginning July 2022.

Both our company and contractor trucks will be on location. Crews will be installing duct and new pad mounted distribution transformers. This will improve the reliability of the equipment in the area and make the system more efficient.

The following area will be affected:

- Alloy Drive

SYNERGY NORTH will notify you of any Planned Outages before they occur.

### Easement Access

Where applicable, Synergy North employees and subcontractors **will need to access the utility easement located on the property** to perform surveying. Crews will then commence with installing duct by directional drilling per the construction schedule.

For reference regarding SNC rights of access to utility easements, please see the Electricity Act, 1998 S.O. 1998, CHAPTER 15, Schedule A, 40.1
