

Ultra-Low Overnight Pricing Plan

Like the TOU prices, under the ULP pricing plan, the price depends on when you use electricity. You can help manage your electricity costs by shifting your usage to lower price periods when possible.

With ULO, there are four price periods:

- Ultra-Low Overnight: When demand for electricity is lowest on average.
- Weekend Off-peak: When demand for electricity is generally lower.
- Mid-peak: When demand for electricity is moderate.
- On-peak: When demand for electricity is highest on average.

Summer Ultra-Low Overnight Pricing (May 1, 2023, to October 31, 2023) is:

24.0 ¢/kWh on-peak
10.2¢/kWh mid-peak
7.4¢/kWh Weekend off-peak
2.4¢/kWh Ultra-Low Overnight

This price plan supports the electrification of the transportation sector in Ontario by enabling EV adoption. The electrification of the province's vehicles, being manufactured in Ontario, will continue to help reduce greenhouse gas emissions by shifting away from gas-powered vehicles and utilizing Ontario's clean electricity supply, one that is more than 90 per cent emissions-free.
